

Time Loss

Time loss caused by employee injury or illness is a real business threat; one that, like a chain of dominoes ready to fall, can lead to one serious problem after another. But just how serious is serious?

Well, start with potential surges in Workers' Compensation premium costs. Then think about skyrocketing claims costs; oh, and don't forget the convoluted, time consuming claims management maze that comes with it. But don't stop there – more dominoes are poised to fall. There's the reduction of productivity, profit losses, eroding absent employee skills and knowledge, expensive training and re-training costs, tumbling staff morale, and last but certainly not least: there's the very real possibility that while your business is reeling from these time loss consequences, your competitors...aren't. Instead, they're merely scooping up your market share and serving your former customers.

That's how serious a threat time loss is to your business; and it's also why you seriously need *QuikCarePRO* by TEKSmed working for you.

QuikCarePRO proactively prevents the time loss dominos from crashing down on your business by reducing claims costs, recovering old claims costs, delivering employees speedy diagnosis and all-access treatment options, completely managing claims from start to finish, and focusing on ability instead of disability through personalized "employee-friendly" return-to-work action plans.

And unlike any other solution, *QuikCarePRO's* fees are based simply and clearly on individual and Industry Experience Ratings, which are applied just like an extended group health plan.

Make no mistake: time loss is a serious threat to your business. But now, fortunately, there's an elegant, proactive and industry-leading solution ready to deliver the care that your employees need, and the peace of mind that you need: *QuikCarePRO*.

Our Philosophy

Workers are your greatest assets. We treat them as such. With QuikCare, your workers benefit from rapid diagnosis and treatment, less stress, less time and wage loss, and a quicker recovery and return to work. You benefit from healthy, productive workers and lower claims costs. Everyone wins. This approach is reflected in our mission statement:

TEKS reduces wage loss and claims costs by helping ill and injured workers maximize their work potential. We focus on ability, not disability; provide fast, world-class healthcare; and help workers return to work safely and quickly. TEKS is committed to Helping Canada Work.

The Right Track

Time loss is disruptive and can severely take your business off track.

Claim costs skyrocket, while profits tumble.

Growth plans falter, while paperwork mounts.

Productivity plummets, while absenteeism soars. Indeed, time loss is chilling, costly and unproductive business; but

fortunately, it's not a part of your business when *QuikCarePRO* is working for you. Using a proven and unique multi-stage approach that covers Health, Ability, and Claims Management, *QuikCarePRO* helps put an end to unmanaged, uncontrolled, and unnecessary time loss. With a range of real business solutions, including expedited healthcare, flexible job return plans, expert claims management, medical consultation and more, *QuikCarePRO* keeps your business where you need it to be: safely on track; smartly moving forward.

Health Management

Time loss hurts employees when they're most vulnerable.

In today's dysfunctional health care system, access to vital services can be delayed months...or even years. Step one medically assesses the injury/illness and develops an effect treatment plan. Step two offers employees an all-access pass to the services they need to heal quickly and safely: MRIs, CT Scans, Xrays, Ultrasounds, specialists, surgeries, Independent Medical Evaluations, and much more. The results? Employees get faster care and enjoy a speedier recovery. Employers controls costs, improve productivity and profoundly boost employee loyalty and morale. It's a win-win health management solution designed by *QuikCarePRO*, and made perfectly for you and your employees when they need it most.

Ability Management

Time loss is agonizing for both employees and employers.

Employees are subjected to long waits, lost wages, and mounting job security fears. Employers face escalating workloads, reduced productivity, and increasing costs. Thankfully, there's an elegant, proven and cost-effective solution: *QuikCarePRO*. *QuikCarePRO*'s dynamic Return-to-Work (RTW) plans keep employers and employees connected while safely reducing the length of employee absenteeism. By focusing on ability instead of disability, *QuikCarePRO*'s personalized, flexible and medically-approved RTW's help employees perform safe, alternate tasks – thereby reducing the agony of time loss for them, while increasing productivity and offsetting employer costs. It simply doesn't get any more "employee friendly" than this!

Claims Management

Time loss is dangerous

because in today's competitive world, employers need to safeguard their investment in a stable, productive workforce – and that's ultimately what *QuikCarePRO* achieves. As we've proven time and again, prompt treatment and RTW's are the keys to cutting claims costs; after all, when WC premiums are your biggest payroll cost, cutting claims costs is excellent business strategy. Still, we go much deeper than this by managing the entire claims process, from filing appeals, to finding errors and omissions, to winning relief of costs. *QuikCare* lifts your burden, saves invaluable time, and most importantly, empowers you to focus on what's truly important: running your successful business.

Always Moving Forward

As a constantly evolving company that delivers an increasing array of client solutions, *TEKSmEd* is delighted to shine the spotlight our one of our newest solutions, Adjudication, Benefits & Claims Management, or *ABC*. Built on *QuikCarePRO*, *ABC* addresses the unacceptable problem of standard ineffective, costly Short Term Disability coverage -- coverage that doesn't offer a proven path to wellness, but instead drives up employer claim costs while employees wait for weeks, months or even years to be served by the increasingly dysfunctional public health care system.

With *ABC*'s revolutionary solution, employees access the medical help they need RIGHT NOW, and at the same time, employers dramatically slash their time loss exposure and bottom-line claims costs. *ABC* also directly pays benefits to employees with approved funds. *ABC* takes care of it all, from the initial injury report, to managing all paperwork, to developing a customized return-to-work (RTW) plan, and ultimately to achieving everyone's unified goal: returning a healthy, happy employee back to work in the safest and most cost-effective manner possible!

In addition, to support our vision of delivering the best, expedited healthcare to our clients, we have introduced plans to open our own executive level health care facility. This facility, called *QuikCare Health Services Inc.*, will have the finest in non-invasive personal healthcare, including our own Magnetic Resonance Imaging scanning machine (MRI). This exciting facility will be opening near our corporate home in beautiful Chilliwack, British Columbia.

About *TEKSmEd*

Beginning modestly in 1994 as a one-person operation under the banner "PlanClaim Management," *TEKSmEd Services Inc.* was formed as a partnership in 1999 and has since grown into the largest privately held company in Canada. With a roster of over 40 specialists in healthcare, claims, client care and sales, and a rock-solid management team to support and lead the way, the team at *TEKSmEd* has managed more than 60,000 time loss and potential time loss incidents, and helped hundreds of clients and thousands of employees. Inspired by a never-ending quest to be the best, *TEKSmEd* continues to set the standard – and raise the bar - for integrity, innovation, and customer service.
